If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a web inspection system for detecting a plurality of web flaws comprising a plurality of smart cameras for generating a digital pixel representation of a portion of the web, including a multi-pipeline pre-processor for filtering corrected pixel representation, the multi-pipeline pre-processor for filtering the corrected pixel representation, the multi-pipeline preprocessor generating a prioritized data stream of potential flaws; a run length encoder for generating location data regarding a location of each group of the potential flaws in a cross direction; a blob detector for generating block data regarding the location of blocks of the potential flaws along a machine direction; and an inspect/reject analyzer for determining actual flaw data from the prioritized data stream of potential flaws.

The closest prior art Bilhorn et al. (US Patent no. 5,696,591) discloses a similar a web inspection system, however, Bilhorn fails to teach or suggest “*a multi-pipeline preprocessor generating a prioritized data stream of potential flaws; a run length encoder for generating location data regarding a location of each group of the potential flaws in a cross direction; a blob detector for generating block data regarding the location of blocks of the potential flaws along a machine direction; and an inspect/reject analyzer for determining actual flaw data from the prioritized data stream of potential flaws.*” as claimed.
